

# Mobile Aquatic Exercise Is Going To The Dogs

By Annie White

September 23, 2017

**Golden, CO** - Ahoy! Mobile K9 Aquatics is on the road and is going to the dogs. The first truck and crew set sail on their maiden voyage last week and have begun to stir interest in their one-of-a-kind mobile aquatic dog-walking service.

Using the natural properties of water such as buoyancy and resistance, along with heat, the Mobile K9 Aquatics treadmill system is a tool that can improve the lives of canines of all ages by fulfilling their exercise requirements. It's also a fantastic way to bring about more movement to reduce pain from arthritis in your older furry friends. This treadmill also creates a low-impact workout to help athletic dogs increase muscle strength, tone and endurance without the damaging effects of land-based exercise.

Based out of Golden, Colorado the Mobile K9 Aquatics crew will come to you. No more struggling to get an elderly, injured, large breed, or just plain stubborn dog in and out of the car. "I am so grateful for this service coming to me and my four-legged family. The ease and effectiveness of this service is bringing us all so much joy. I still cannot believe that it only takes about 7 minutes to get my active Poodle tired, and he doesn't seem to be sore afterwards, like he was after our walks through the neighborhood", says Lauren Clark, a now "devoted" client. "Thank you, Mobile K9 Aquatics!"

Meanwhile, the company owners are preparing to open this amazing service to franchise. In a state with dogs that are as active as their owners, there is great potential to see a full fleet of these trucks rolling into neighborhoods all over Colorado, and beyond! Would you like to learn more and unlock the power of water?
